

NADIA BONOMETTI

AI Image Quality Specialist · Visual Output Evaluator · Prompt Engineering Specialist

technadtab@gmail.com · Italy (fully remote) · www.aidangallery.com

Portfolio: aidangallery.com · karmitee.com · vimeo.com/groups/poprallyabstract

PROFESSIONAL SUMMARY

AI Image Quality Specialist & Visual Output Evaluator with 15+ years of expertise in visual arts, prompt engineering, and creative direction. Hands-on daily practice in critical evaluation of AI-generated images across 10+ platforms (Midjourney, Flux, Leonardo AI, Recraft, Ideogram, Stable Diffusion, DALL-E, Gemini, Grok Imagine, Adobe Firefly) — assessing composition, anatomical accuracy, stylistic coherence, prompt-output alignment, contextual fidelity, and detecting visual hallucinations. Selected artist for the Museum of Modern Art (MoMA) PopRally collective, New York. Active management of an AI-driven apparel brand (Karmitee) requiring continuous output evaluation and prompt refinement. Familiar with RLHF principles and human-in-the-loop feedback workflows. Available for remote AI image tutor and evaluation roles, fully flexible schedule.

KEY SKILLS

AI Image Evaluation & Quality Assessment

- Critical evaluation of AI-generated images: composition balance, anatomical accuracy, prompt-output alignment, contextual fidelity, stylistic coherence, color palette consistency
- Visual hallucination detection: anatomy errors (extra fingers, distorted limbs), text rendering issues, object inconsistencies, perspective and lighting flaws
- Output comparison and preference ranking (A/B evaluation) across multiple model outputs
- Safety and policy compliance review: identification of unsafe, biased, or policy-violating visual content
- Familiarity with RLHF (Reinforcement Learning from Human Feedback) principles and human-in-the-loop evaluation workflows
- Structured written feedback in English on model output quality

Prompt Engineering & AI Platforms

- Advanced prompt engineering for image generation: composition, lighting, color theory, style direction, anatomy, text rendering, narrative coherence
- Multi-platform expertise: Midjourney, Flux, Leonardo AI, Recraft, Ideogram, Stable Diffusion, Adobe Firefly, DALL-E (ChatGPT), Gemini, Grok Imagine
- Iterative prompt refinement based on output evaluation — closing the feedback loop between generation and quality assessment
- Cross-model output comparison and benchmarking

Visual Expertise & Design Foundation

- 15+ years professional experience in digital illustration, graphic design, and creative direction
- Adobe Photoshop (advanced), Affinity Designer
- Print-ready and web-optimized visual production
- Selected artist for Museum of Modern Art (MoMA) PopRally collective, New York

PROFESSIONAL EXPERIENCE

Karmitee — Founder & AI Visual Director | 2025 – Present · www.karmitee.com

- Daily critical evaluation of AI-generated images for apparel design — assessing anatomical accuracy, prompt fidelity, stylistic coherence, and print-readiness across hundreds of generated outputs
- Iterative prompt engineering refinement based on output quality analysis — closing the loop between generation, evaluation, and re-prompting
- Multi-platform output comparison: benchmarking same prompts across Midjourney, Flux, Leonardo, Ideogram to identify model-specific strengths and weaknesses
- Hallucination and quality control: rejection of outputs with anatomical errors, text rendering issues, or contextual inconsistencies before production
- End-to-end visual pipeline: from prompt design to final print-ready asset

Aidan Gallery — Digital Artist & AI Visual Producer | www.aidangallery.com

- Production of digital artworks combining AI image generation with traditional illustration techniques
- Critical evaluation and selection of AI outputs across multiple platforms for gallery-quality standards
- Collaboration with established artists including Milo Manara (Nel Segno di Manara, Bologna) — 4 plates produced
- Portfolio: Aidan World (16 works), Pop Gallery (18 works), Seasons (5 works)

MoMA PopRally — Selected Artist | *Museum of Modern Art, New York*

- Visual works selected for official MoMA PopRally collective exhibitions: Inventing Abstraction and Abstract Generation

ADDITIONAL TECHNICAL SKILLS

Adobe Photoshop (advanced), Affinity Designer · Browser-based AR development (MindAR.js, A-Frame WebXR) · HTML / CSS / JavaScript · Meta Ads Manager and Meta Business Suite · Social media content creation for Facebook and Instagram

EDUCATION

- Digital Graphics & Communication · SinerVis Consulting, Milan (2008 – 2011)
- Marketing Techniques · Cegos – Beyond Knowledge, Milan (2000 – 2002)
- Certificate of Merit · Leonardo da Vinci Academy, Milan (2012)
- High School Diploma · I.T.C.S. A. Lunardi, Brescia

LANGUAGES

- Italian — Native
- English — Professional working proficiency (written and spoken)

ADDITIONAL INFORMATION

- EU VAT registered independent contractor — available for remote project-based collaboration
- Fully flexible schedule, no time zone constraints
- Comfortable working with US-based platforms and clients
